

Sustainability in Mid Sweden University everyday life (HIMUV)

Marcia Håkansson Lindqvist, MIUN

EwS 2022, ATU Sligo, 15-17th, August, 2022

A little bit about Mid Sweden University...

Two campuses

Sundsvall

Östersund

MID SWEDEN UNIVERSITY IN NUMBERS

34 054 books were lent out, and 707 916 chapters from e-books were downloaded at the Mid Sweden University Library. The Library had 3 551 participants in teaching/supervision in 2021

Education

Teacher education and maritime education start in Härnösand

1842

Socialtjänstebolaget starts in Östersund

1971

Högskolan i Sundsvall/Härnösand and Högskolan i Östersund start as a result of the higher education reform

1977

Both university colleges are merged and become Mittelhögskolan, which has the ambition of becoming a full university

1993

The College of Social Health in Sundsvall/Örnadalshögskolan and in Östersund become part of Mittelhögskolan

1995

Sustainability at MIUN

Sustainable development is a central and important part of the overall strategy of Mid Sweden University.

Mid Sweden University's sustainability strategy...

The strategy states a number of goals that are related to sustainable development directly or indirectly, where the most direct goal specifies that Mid Sweden University should:

- Increase the integration of sustainable development in education, research and collaboration
- Contribute to the UNs global goals for sustainable development and Agenda 2030, and thus also to a sustainable future
- Reduce the organization's negative impact on the environment

Sustainability in Mid Sweden University everyday life (HIMUV)

Aim of the project:

- to increase knowledge regarding sustainable development among all university employees and students
- It aspires to provide the opportunity to contribute to Mid Sweden University becoming an important player in the work for increased knowledge regarding sustainable development.
- increase and strengthen the sustainability culture among the university's employees and students
- Project runs from June 2021-June 2023

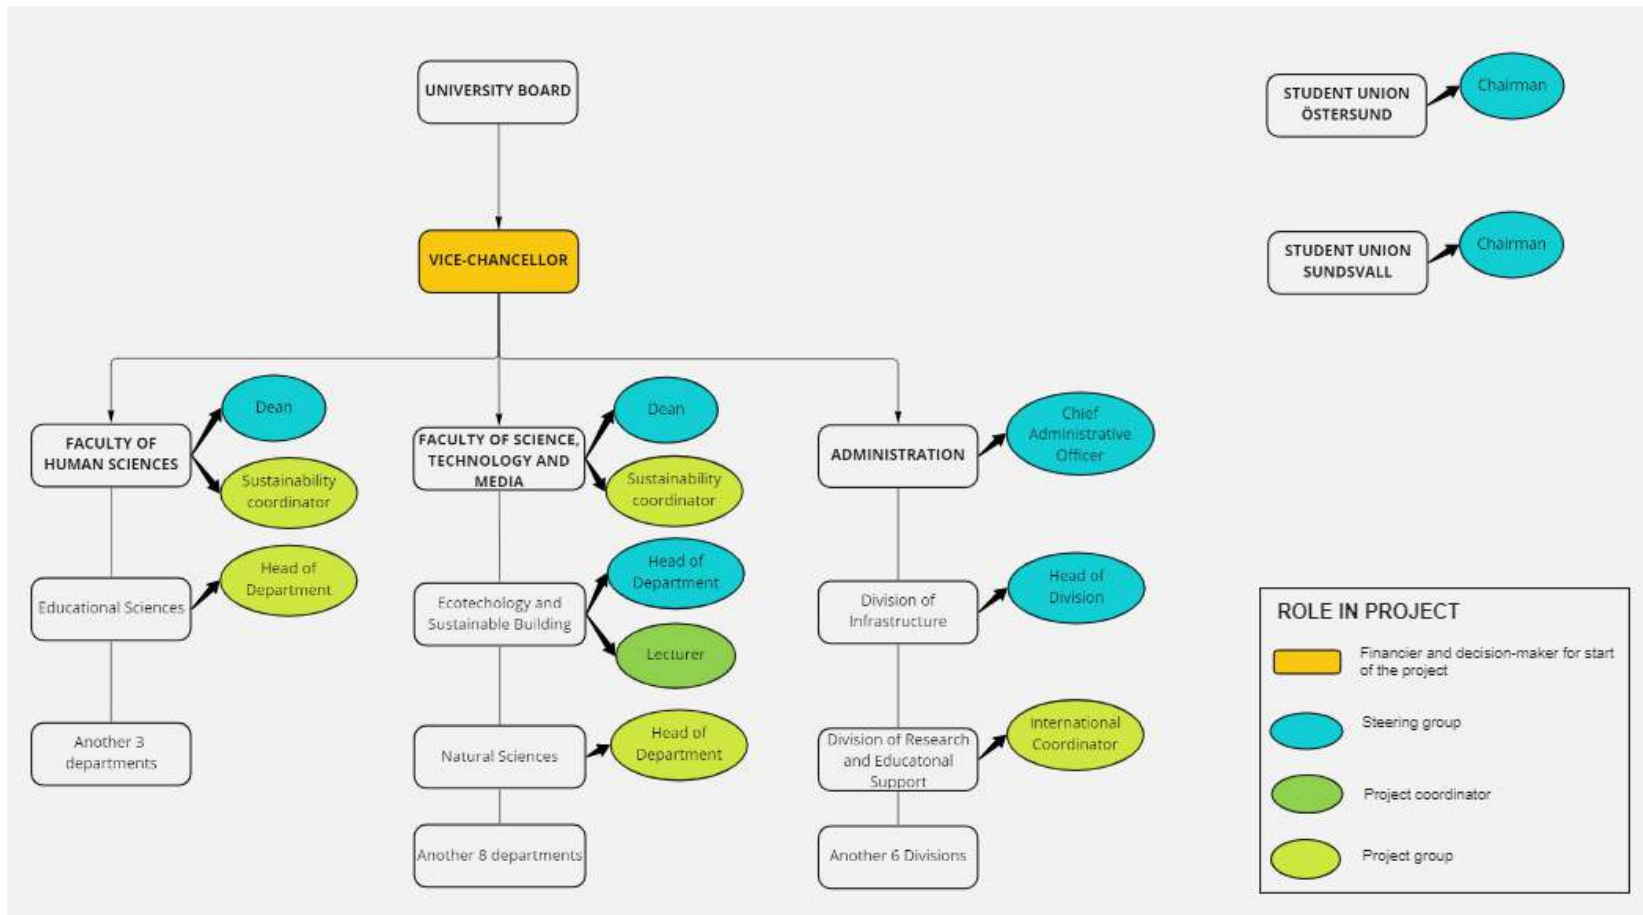

This aspires...

- to be able to work with sustainably, employees and students must know how the University defines sustainability
- to become a natural part of everyday work

Project organisation

Project steps...

Map the knowledge about sustainability among the university's different professional categories (focus group interviews)

Design educational materials for employees and students

Create a list of suggestions regarding what employees and students should know about sustainability

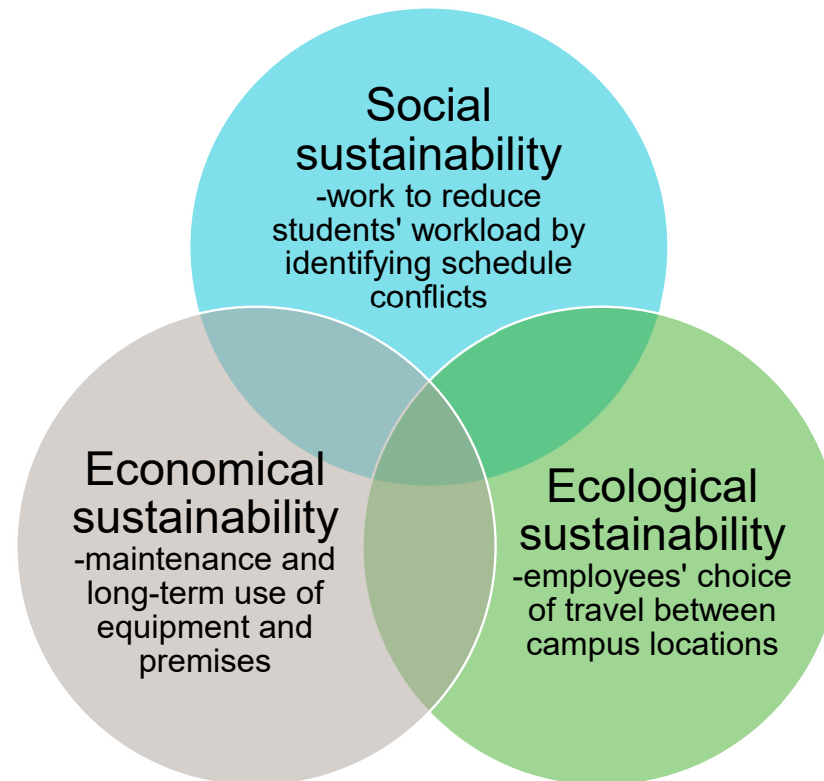

Digital education material for employees and students

- Collection of good examples
- Present different functions and subjects at the university
- Incorporate sustainability in everyday life at work

Sustainability in everyday life in an educational context

How do you work with sustainability at your university?

Please share good examples...
